

Working student in software development (Java/JavaScript/SQL/ XML/HTML) (m/f/d)

Description

BusinessCode GmbH develops tailor-made enterprise application software in projects using the in-house developed open source framework "BCD-UI". BusinessCode offers analysis, development, consulting, hosting, training and maintenance of database-based web applications from one source.

To strengthen our team in **Bonn** we are looking for a new team member now:

Working student in software development (Java/JavaScript/SQL/XML/HTML) (m/f/d)

Responsibilities

We're looking for:

A student (m/f/d) from the mathematical-scientific-technical field to **support** our team in the **further development of our [BCD-UI Library](#)**.

Qualifications

- Good knowledge of Java, JavaScript, XML, relational databases and SQL
- These terms should not be alien to you: JDBC, HTML, JavaScript, Git
- Willingness to understand the technical requirements and challenges of product development
- Independent work, joy of experimentation and the fun of innovation

Job Benefits

- You can arrange your working hours to suit your university studies.
- English speakers welcome
- We are also happy to supervise Bachelor and Master theses.
