BusinessCode

Your opportunity

BusinessCode

BusinessCode GmbH develops customized enterprise application software in projects using the self-developed open-source framework "BCD-UI". We offer our customers services such as analysis, development, consulting, hosting, training and maintenance of database-based web applications from a single source.

At our location in **Bonn** we are looking for a

Graduate (m/f/d)
(computer science, mathematics, physics and related courses of study)
for the area of software development
(Java / SQL / XML / HTML)

to support our team **in the development of enterprise software for internationally operating customers as well as in the further development of our own software.**

We expect
- Good knowledge and experience in the use of Java, XML, relational databases and SQL
- Experience in web technologies (HTML5, CSS3, JavaScript)
- Experience in software development, DevOps and the appropriate development tools
- Enthusiasm to implement business requirements into IT solutions in an agile process
- Proven ability to work in a team as well as independently and in a structured manner
- Willingness to experiment and learn
- Interest in innovation and getting to know new technologies

We offer
- Warm, open and inspiring working atmosphere
- Varied work in an international customer environment
- Excellent public transport connections, JobTicket and bicycle parking spaces in our office in downtown Bonn

We look forward to receiving your application at **jobs@business-code.de**.
